ERGÖRÜ 210 NIGHT VISION SIGHT

ERGÖRÜ 210 NIGHT VISION SIGHT is designed for targets detection on the battlefield and performance of aimed firing using small, sporting and hunting arms of up to 12.7 mm caliber in the night mode at distances up to 450 m. The sight can also be used for observation and orientation in the nighttime.

The main features are:

Light
Protection

Lens Diopter
Adjustment Lock

Laser
Lighter

CHARACTERISTICS

≡	Receiver type	Image intensifier 2+/3
◀	Objective Lens, mm	F1.4/90
✂	Field of view, degrees	7.0
🔍	Optical magnification	x4
↕	The inclination of the sight axis	20 min down
⊕	Alignment pitch, mil	0.1
✳	Alignment range, mil	20
🔋	Batteries	CR123
🌞	Laser illuminator wavelength, nm	850
🔦	Laser illuminator power, mW	100
🌡	Operating temperature range, °C	-25...+50
⏰	Dynamic load limit, g	750
🕒	Continuous operation time in combat mode, hours	35
✳	Dimensions, mm	195x90x95
🏋	Weight, kg	1.3
